

**TULCAN ENERGY**  
Resources Limited

# Company Profile

# corporate Philosophy

## Our Vision

To become the preferred energy resource partner

## Our Mission

To meet energy needs by creating exceptional value through innovation, efficiency and accountability

## Our Core Values

### **Respect**

At Tulcan Energy, we believe every human being has inherent value, no matter his or her station. This is why we accord respect to each individual. We see their worth and appreciate their value. We believe when you give respect, it always comes back

### **Responsibility**

At Tulcan Energy, we are accountable to ourselves and to one another. We accept responsibility to own and solve issues. Anyone's problem is everyone's problem. We believe we are responsible to the company (as stakeholders), to our clients (as partners) as well as to the country (citizens)

### **Reliability**

Integrity is the fulcrum of our business. We inspire trust in people and ensure that our words is our bond. We are intentional about cultivating a reputation of reliability-both with our employees as our customers.

### **Resilience**

The Tulcan spirit is a can-do spirit. We see stumbling blocks as building blocks, adversities as opportunities. We are strong enough to withstand and agile enough to adapt. We never give up.

# Who are we...

We are an independent integrated energy company offering exceptional value across the energy spectrum. We are a value-driven company poised to meet and exceed expectations of our stakeholders.

In essence: **we source, store and sell energy.**

Tulcan Energy creates value in:

**Upstream:**  
EPCM projects,  
Exploration and  
Production of Crude  
and Gas Condensates.

**Downstream &  
Midstream:**  
sourcing & supply of  
crude and white  
products; lubricants  
and Chemicals,  
Product Retail

**Renewable Energy:**  
Captive Power, Solar  
Cells, Hybrids,  
Magnetic and Gravity  
Power Generation

# Upstream

We carry out offshore field development, production, field evaluation, and exploration.

## Our Services:

- EPCM (Engineering, Procurement and Construction Management) Projects
- Exploration & Production of crude oil
- Gas condensates

Majority of our key upstream offerings are engineering, construction, procurement, and management. We build facilities required for exploration, production, and refining of oil and gas. including pipelines, refineries, and storage tanks. acquiring goods and services required for upstream oil and gas activities, including drilling equipment, materials, and services. With proper management from planning and design to construction.

# Midstream & Downstream

We source & supply crude and white products;  
lubricants and Chemicals, Product Retail

In the **midstream** sector, we are focused on the transportation, processing, and storage of oil and gas resources. This includes pipelines, processing plants, and storage facilities that allow us to move oil and gas from the production site to refineries and other downstream facilities.

In the **downstream** sector, we are involved in the refining, marketing, and distribution of petroleum products. This includes gasoline, diesel fuel, and other refined products that are used in a wide range of industries, from transportation to manufacturing.

# ESG

We are a responsible company conscious to the needs of people, systems and the environment.

## Environment

We are environmentally sensitive to climate change and stand with the UN on the clarion call to reduce GHG emissions and facilitate a carbon neutral society. To reinforce our beliefs in these regards are our efforts and collaborations in the

- Ecological concepts
- Pollution Awareness
- Renewable Energy

## Social

We support and encourage equal opportunities for all people regardless of race, culture, gender, disability, religion or tribe. We also respect the rights and dignity of every human being. Youth development has also been in the core of our human resource policies

## Governance

We adhere to global business ethics and compliance. Our Board is composed of seasoned individuals who are as proficient as they are independent. Tulcan is run by the strictest standards of professionalism, integrity and transparency.

# CSR

## Education

Tulcan Energy sponsors and supports the annual TeensThink Essay competition. The TeensThink initiative organizes essay competitions among teens selected from various schools across the 36 states of Nigeria. TeensThink is a platform where leadership skills are harnessed, it is also an educative platform where teens come together to interact and build their communication skills and career path through a wide range of educative/informative materials.

## Sports

Tulcan Energy is the major sponsor of the NWFL Super 6 League. The Nigeria Women Football League (NWFL) is the governing body of the professional women's football association in Nigeria. This event comprises of the top 6 teams of the Nigeria Women's League. The Nigeria Women's Premier League is now known as the NWFL Premiership, the second-tier league known as the NWFL Championship, while the third-tier division is known as the NWFL Nationwide.

## Arts

Tulcan Energy supports the creative industry such as music, movie production, and comedy shows, etc. We have supported Sneeze production in the expression of its artistic talents in several movies and documentaries. In 2022, Tulcan Energy sponsored the BOVI show (Naughty by Nature) which was held at the Eko Hotel, Victoria Island, Lagos, Nigeria. This event effectively showcased new and upcoming talents in the comedy, music, and drama industry.

# Our Value Proposition
